ergonomic products

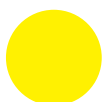

Made
in Italy

COLOUR CODE: THE ADVANTAGES

Blue

Yellow

Red

Green

White

Using the Colour Code, it is possible to divide the equipment suitable for cleaning specific and distinct environments.

- **SPECIFICITY** - A different colour is assigned to each area or compartment.
- **VISIBILITY** - Each product is immediately identified.
- **HYGIENE** - The use and cleaning of products is restricted to specific and distinct areas.

This allows to create a very effective system which minimizes the risk of contamination. For this purpose, the entire range of products of the Hygiene and Detectable lines is available in 5 colours: **White, Yellow, Red, Green, Blue.**
