

GREEN POWER DISHWASHER

Update: 26/05/2025

DETERGENT FOR MACHINE WASHING OF DISHES

GREEN POWER DISHWASHER is a high alkalinity detergent based on potassium hydroxide for the mechanical washing of dishes in the presence of hard water above 25-30°F. The formulation has a high cleaning power which, in association with the combination of sequestrants and anti-redeposition agents, is able to provide excellent results even in difficult washing conditions.

Excellent for bar washers, it guarantees the total absence of limescale residues on glasses while drying.

GREEN POWER DISHWASHER is a product with the **ECOLABEL** mark.

The product complies with European regulations relating to the environmental impact and biodegradability of the raw materials contained (EC Reg. 648/2004).

100% recyclable packaging.

IT/020/032

DOSAGES AND METHODS OF USE

Use exclusively with dosing equipment.

electronics. The concentrations vary from 1.0g/l to 2.0g/l and depend on the hardness of the water and the type of dirt.

The temperature of the washing water must be between 55°C and 60°C.

FIELD OF USE

It can be used in all dishwashing machines, whether single-tank, continuous cycle, tracking or multi-tank and in any water hardness condition.

Particularly suitable for glasswashers.

CHEMICAL-PHYSICAL PARAMETERS

- ✓ APPEARANCE: liquid
- ✓ COLOR: colorless
- ✓ PERFUME: typical
- ✓ pH: 12,5 – 13,5
- ✓ DENSITY (g/ml): 1,20

WARNINGS

The product must be handled with all the precautions reserved for a corrosive product. It must be stored away from heat sources and direct contact with sunlight. Do not mix with other products.
