

CLEAN ECO LAVATRICE

Update: 26/05/2025

POWDERED DETERGENT FOR WASHING MACHINE

CLEAN ECO LAVATRICE is a scented powder detergent, with controlled foam, for hand and machine washing of colored and non-coloured garments. The surfactants present in **CLEAN ECO LAVATRICE** have been chosen in such a way as to offer, at the temperatures and dosages indicated, a good degree of cleanliness of the washed items and a moderate formation of foam during washing.

The product acts on organic dirt by emulsifying and dissolving it in the washing bath thanks to the action of surfactants and alkalising agents. All without causing alterations to the colors and properties of the fibres. In fact, garments treated with **CLEAN ECO LAVATRICE** do not felt and retain their natural elasticity and softness.

CLEAN ECO LAVATRICE is suitable for domestic and industrial laundry.

It guarantees excellent results at both low (30°) and medium temperatures (60°) on natural and synthetic fibers and is also suitable for washing at high temperatures (90°). Particularly active on coffee stains thanks to the combined oxidizing and bleaching effect.

DOSAGES AND METHODS OF USE

Recommended doses in grams per kilogram of dry laundry, based on the hardness of the water expressed in French degrees.

FRESH WATER (0 – 15°F)

- ✓ MACHINE WASH: 8 g/kg
- ✓ MANUAL WASHING: 6 g/kg

MEDIUM WATER (16 – 25°F)

- ✓ MACHINE WASH: 12 g/kg
- ✓ MANUAL WASHING: 9 g/kg

HARD WATER (>25°F)

- ✓ MACHINE WASH: 16 g/kg
- ✓ MANUAL WASHING: 12 g/kg

FIELD OF USE

CLEAN ECO LAVATRICE is used for washing clothes, by hand or in the washing machine, both colored and non-coloured items.

It can be used on any type of washing machine. Do not use for woolen and delicate items.

CHEMICAL-PHYSICAL PARAMETERS

- ✓ APPEARANCE: powder
- ✓ COLOR: white and blue
